gh github.com/Carrione web carrione.github.io/Portfolio

PROFILE

Senior iOS developer with 8 years in Swift (and Objective-C when needed), 19 apps shipped, from brands like Heureka, ŠKODA AUTO, Tesco and Patria Finance to my own periodic table app, Elementa. Equally comfortable owning an app alone end-to-end or working in a team on a large shared codebase — CLEAN/MVI, Swift 6 strict concurrency, Kotlin Multiplatform and CI/CD. Looking for an iOS role in Prague or remote.

DEV STACK

Swift 6 · Obj-C · Kotlin · Kotlin Multiplatform · CLEAN · MVVM+C · MVI + FlowController · SwiftUI · UIKit · WidgetKit · MapKit · Combine · Observation · Swift Concurrency · CoreData · SwiftData · GraphQL · URLSession · Alamofire · SPM · CocoaPods · XCTest · Swift Testing · XCUITest · Shell scripts · Firebase · Fastlane · Git · GitLab CI · Jira · Figma · AppsFlyer · Didomi · Meiro · Poeditor · Moko-resources · Affinity Designer · Illustrator · Photoshop

EDUCATION

Unicorn University — Bc. Information Technology (2014 – 2018, full-time from 2016)
High School of Machine Engineering — High School Graduation

LANGUAGES

Czech — native
English — professional

EXPERIENCE

Independent 06/2026 – present
iOS Developer · Prague

- Building several own iOS apps end-to-end, from product idea and design to architecture and release. Where it makes sense, the domain and data layers are shared via Kotlin Multiplatform.
- iOS applications:
  - PERIODIC TABLE - ELEMENTA (App Store, 10/2026) – an interactive periodic table for students, iPhone & iPad, Czech & English
  - further apps in development
- Key achievements:
  - Shipped Elementa solo, from design to App Store release. Clean Architecture with every layer as a local SPM package, MVI + FlowControllers, Swift 6 with MainActor default isolation.
  - Unit tests in Swift Testing, UI tests in XCUITest; App Store screenshots captured automatically by a UI test plan in both languages.
  - Accessibility (VoiceOver, colour-independent legend), String Catalogs, no third-party dependencies and no data collection.

Swift 6 · SwiftUI · Observation · Swift Concurrency · Swift Testing · XCUITest · String Catalogs · SwiftData · CoreData · MapKit · WidgetKit · SPM · Firebase · Kotlin Multiplatform · Koin · Ktor

Heureka Group 08/2021 – 05/2026
iOS Developer · Prague · 4 yrs 10 mos

- iOS applications:
  - HEUREKA CZ
  - HEUREKA SK

- Team:
  - One of two in-house iOS developers & iOS guarantor, working alongside 2–3 agency developers.
- Responsible for:
  - End-to-end iOS feature development from requirement analysis to release (TestFlight/App Store); code reviews and manual QA of team PRs/builds; iOS technical debt management; App Store Connect and team access administration.
- Owned:
  - Apps stability and performance across a shared 323k-LOC codebase (iOS + shared KMP layer) powering HEUREKA CZ (4.7★) and HEUREKA SK (5.0★); Swift 6 adoption incl. strict concurrency; automated test suite.
  - iOS CI/CD and build server (sole owner): took over the existing pipeline and rebuilt it several times; cut the build time of the KMP-based app from 14 to 3 min through pipeline optimisations and a hardware upgrade. Moved the build server from MacStadium back in-house after an efficiency and cost analysis — faster response times, the hardware paid for itself within a year, and data fully under our own control. Introduced AI code review in CI, which added a consistent security check to every merge request.
- Key achievements:
  - Integrated the shared Kotlin Multiplatform layer into the iOS app (most features migrated to KMP); rewrote parts of the codebase into shared Kotlin; tested and signed off the KMP-based iOS release to production.
  - Contributed to the Android presentation layer (Jetpack Compose).
  - Introduced MVP in the presentation layer, later superseded by CLEAN + MVI with FlowControllers, co-approved with the external partner; enforced architecture consistency through code review.
  - Designed and implemented product comparison; migrated selected features from REST to GraphQL; rewrote views to SwiftUI (navigation kept in UIKit); introduced local SPM packages; integrated the apps with the web shopping cart; adopted Liquid Glass.
  - Represented the company at developer meetups.

Swift 6 · CLEAN/MVI+ FlowController · SwiftUI · UIKit · Observation · Swift Concurrency · Combine · GraphQL · URLSession · SPM · Factory · XCTest · Kotlin · KMP · Jetpack Compose · Koin · Ktor · Firebase · Jira · Fastlane · GitLab-CI · Shell scripts · TestFlight · AppsFlyer · Figma · Poeditor · Moko-resources · Didomi · Meiro

adastra.one 05/2019 – 07/2021

iOS Developer · Prague · 2 yrs 3 mos

- iOS applications:
  - MEDIA CLUB, s.r.o. – Kiss, Beat, Radio 1, Spin, Country and Signál
  - T-Mobile Czech Republic a.s. – Český florbal
  - Tesco Lotus – Tesco Lotus Thailand
  - Tesco Stores (Malaysia) Sdn. Bhd. – Tesco Online Malaysia
  - TM BidX1 Technology Limited – BidX1
- Responsible for:
  - Sole iOS developer on all projects — end-to-end ownership from requirement analysis to App Store release, working with a designer, backend developer and product owner.
- Key achievements:
  - Rebuilt a legacy codebase into a multi-target architecture delivering 6 branded radio apps from a single codebase within 5 months, alongside other projects.

Swift 5 · Obj-C · MVVM · Coordinators · UIKit · Combine · Moya · Alamofire · AFNetworking · URLSession · CoreData · CocoaPods · XCTest · Firebase · Fastlane · Jira · Shell scripts · TestFlight

Unicorn a.s. 10/2018 – 04/2019
